# About RR Global

RR Global, a USD 1.25 billion conglomerate has moulded its success on innovation. Since the foundation of the brand, its architects opted that innovation is the key to success of every product in the brand. It was a really courageous decision because at that point in time categories like wires and cables were highly commoditized. This optimistic development led to the creation of a brand - RR Kabel, a name which is admired worldwide with existence over 90+ countries across the globe.

Presently the company is ranked amongst the top three retail wire manufacturers across the nation. It is also the largest consumer of copper in India, an achievement which no one would have imagined a cable and wire company to be capable of and that is the reason they are preferred by clients who are some of the largest copper manufacturer in the country.

RR Global takes honour in establishing 9 companies and global offices, primarily in the U.A.E and Bangladesh. In their endeavour to set international benchmarks, RR Kabel has received 19 international accreditations. They are the first in India to have BASEC (U.K.), UL (U.S.A.), VDE (Germany), among others for its wide range of cables including ISO 50001 and ISO 14001.

Across the course of four decades, their impulse towards innovation to achieve success and hard work steered them to earn phenomenal recognition with RR Kabel becoming the desired choice for wires and cables not only in India but also on a global platform.

RR Global India focusses on cutting edge technology and research to enhance efficiency, reliability, and safe conduction of electricity. This in turn supported the core of the company's engineering endeavour which is to guarantee safe environments everywhere- offices, commercial spaces, industrial plants, and residences.

**COMFORT**  
is in the **AIR**

RR Fans Product range is offered by RR Global, a USD 1.25 billion conglomerate in the electrical sector with a presence in over 85 countries globally.

Flagship brand RR Kabel (Wires & Cables) along with other Consumer Products Brand RR Fans, RR Lighting, RR Switches, RR Appliances and Arraystorm (Commercial Lighting) are part of marquee RR Global Brand.

RR Fans offer a wide range which is premium looking, high on performance and priced economically for various residential, commercial, institutional and industrial purposes. The range spectrum spreads across Ceiling Fans, Table / Wall / Pedestal Fans, Ventilation Fans, Exhaust Fans (Light Duty / Heavy Duty), Air circulators.

## TECHNICAL FEATURES

### Luminous flux :

The luminous flux describes the quantity of light emitted by a light source. The luminous efficiency is the ratio of the luminous flux to the electrical power consumed (lm/W). It is a measure of a light source's economic efficiency. Unit: Lumen (lm)

### Luminous intensity :

The luminous intensity describes the quantity of light that is radiated in a particular direction. This is a useful measurement for directive lighting elements such as reflectors. It is represented by the luminous intensity Distribution curve (LDC). Unit: Candela (cd)

### Illuminance :

Illuminance describes the quantity of luminous flux falling on a surface. Relevant standards specify the required illuminance (e.g. EN 12464 "Lighting of indoor workplaces"). Unit: LUX (lx)

### Luminance :

Luminance is the only basic lighting parameter that is perceived by the eye. It describes on the one hand a light source's impression of brightness, and on the other, a surface and therefore depends to a large extent on the degree of reflection (color and surface). It is expressed as candelas per square meter (Metric units). Unit: cd/m<sup>2</sup>

### Color Rendering Index (CRI) :

A scale of the effect of a light source on the color appearance of an object compared to its color appearance under a reference light source. A low CRI rating suggests that the colors of objects will appear unnatural under that particular light source.

Color Rendering Index (Ra)	Real Object Color Appearance
Ra < 60	Poor
60 < Ra < 80	Good
80 < Ra < 90	Very Good
90 < Ra < 100	Excellent

### Correlated Color Temperature (CCT) :

The color temperature is a specification of the color appearance of a light source, relating the color to a reference source heated to a particular temperature, measured by the thermal unit Kelvin (K).

Color	Color Temperature	Appearance	Association
WW (Warm White)	Upto 3300 K	Raddish	Warm
NW (Neutral White)	3300- 5300 K	White	Neutral
CDL (Cool Day Light)	From 5300 K	Bluish	Cool

**Luminaries:** A device used to distribute or modify light produced by light sources installed within it.

**LED:** Abbreviation for light emitting diode. A developing illumination technology which consumes lower energy than similar light sources.

**Light:** Light is that part of the electromagnetic spectrum that is perceived by our eyes. The wavelength range is between 380 and 780 nm. The cones come on during the day and we see colors, whereas at night the rods take over and we only see shades of grey.

**Light source:** An electrical device used to produce light, such as ahalogen lamp, a neon tube or an LED.

**Beam Angle:** The angle of the given photometric body, measured at the half of the maximum light intensity emitted in the main direction of the lightbeam. The angle determines the width of the light cone. Unit: Degree

**Lens:** Transparent or translucent medium that alters the directional characteristics of light passing through it. Used to shape the light source made of glass, poly carbonate or acrylic.

**Reflector :** A surface of mirrored glass, painted metal, polished metal or metalized plastic that is shaped to project the beam from a light source in a particular direction. Reflectors may be an integral part of a lamp or they may be part of the Luminaries.

## TECHNICAL FEATURES

Parameters	Value
Make	RR
Operating Voltage	160-270V
PF	>0.9/230V ac
THD	<20%, <15%
Luminaire Efficacy	>100lm/W @ 3000K
Color temperature	2700-6500K
CRI	>85
LED Beam Angle	60Deg, 90 Deg, 120 Deg
Frequency	50Hz
Efficiency	>90%/ 230Vac @ full Load

Surge protection	Indoor 4KV, outdoor 6KV
Burnings life	50000hrs

**SMD** Surface Mounted Devices

**COB** Chip On Board

### Mounting Description

### IP INDEX

The Ingress Protection (IP) code denotes the protection against dust, solid objects and moisture provided by the luminaire enclosure. The IP number is defined by a numerical field of two digits placed on the right of the letters IP. The first digit corresponds to the degree of protection against the penetration of dust and solid matter, while the second digit corresponds to the degree of protection against the penetration of liquids.

First digit: degree of protection against solid objects and dust

0. Non protected

1. Protection against solid objects, diameter larger than 50 mm
2. Protection against solid objects, diameter larger than 12 mm
3. Protection against solid objects, diameter larger than 2.5 mm
4. Protection against solid objects, diameter larger than 1 mm
5. Dust accumulation protected
6. Dust penetration protected

Second digit: degree of protection against moisture and water

0. Non protected

1. Drip-proof against vertical water drops
2. Drip-proof when tilted at angles up to 150
3. Protection against sprinkled water when falling at angles up to 600
4. Splash-proof
5. Jet-proof
6. Jet-proof, powerful water jet
7. Water immersion for 30 minutes at a depth of 1 meter
8. Water submersion

A family of three, a mother, a father, and a young child, are all wearing white clothing. They are in a bedroom with white walls and light-colored curtains. The mother and father are standing on either side of the child, who is lying on their back on a bed. They are all smiling and looking at the camera. The mother is on the left, the father is on the right, and the child is in the center. The child is lying on their back with their head tilted back and arms raised. The mother and father are leaning over the child, with their hands near the child's head. The overall mood is happy and playful.

**Home  
Essentials  
for a beautiful  
everyday**

Comfort manifests in not just the big things, but in the small, everyday essentials that help life better. Choose from a wide range of Water Heaters, Room Heaters & Irons, each guaranteed for quality performance, tested by time.

Backed by efficient and earnest customer service, we constantly strive towards coming up with products that help make life comfortable.

# STORAGE WATER HEATER

## STORAGE WATER HEATER - ARDOR QUBE

15 Ltr | 25 Ltr

**NEW  
ARRIVAL**

- 5 star bee rating - for low power consumption
- Adjustable temperature knob for convenience
- Suitable for pressure pumps and high rise buildings
- Puff insulation for efficient power consumption
- Auto cut off provided for safety
- Vitreous enameled glass line tank for long life
- Incloy heating element

Voltage	Type	Frequency	Wattage	Rated Pressure

# INSTANT WATER HEATER

## INSTANT WATER HEATER - RAVISH

03 Ltr

**Fire retardant  
power cord**

- Fire retardant power cord for maximum safety
- Weldless SS 304 L tank that enhances resistance to corrosion ensuring long tank life
- Rust and shock proof outer body
- Capillary thermostat for higher efficiency
- Leakage proof integrated pressure valve
- Anti Siphon protection designed to prevent any backflow of water and protect the heating element from dry heating
- Disc type thermal cut-out for higher efficiency

Voltage	Type	Frequency	Wattage	Rated Pressure
230V	Instant	50Hz	3 KW	6.5 Bar

**Weldless SS  
304 tank**

**Rust and shock  
proof outer body**

**Capillary  
thermostat**

**Dual LED  
Indicator**

**Anti Siphon  
protection**

# GAS WATER HEATER

## GAS WATER HEATER - LPG/PNG

06 Ltr

- Better safety during gas flow with single solenoid valve
- Secondary automatic overheat protection Thermal cutout
- Flame failure device
- Gas leakage protection
- Mesh on water inlet, gas inlet and chimney to avoid scaling, blockage, dry heating and impurities
- Variable pressure Compatibility Suitable for low and high water pressure (upto 8 bar)
- Safety lock To control the ON/OFF operation
- ISI Certified product For safety and quality

Rated Capacity	Rated Heat Input	Frequency	Rated Pressure
6 L/min	10kW	50Hz	LPG- 2900 Pa / PNG-2000 Pa

# IMMERSION WATER HEATER

## IMMERSION WATER HEATER

1.0 KW | 1.5 KW

- Shock proof handle - complete protection against electric shock
- Water Proof Handle
- Instant heating
- Water level indicator

Voltage	230V
Type	Immersion Heater
Frequency	50Hz
Wattage	1.0 KW / 1.5 KW

- Shock proof bakelite handle
- Power Indicator
- Instant Heating
- Water Level Indicator
- Energy efficient

Voltage	230V
Type	Immersion Heater
Frequency	50Hz
Wattage	1.0 KW / 1.5 KW

Heavy copper heating element

Nickel Plating for Corrosion Resistance

Plastic Shockproof waterproof handle

Neon Indicator\*

Sturdy Bucket Clip

**Replacement Warranty**
